

SUMMARY

B.Tech CSE student (graduating 2027, CGPA 8.87) with hands-on experience building Full Stack Applications, AI/ML pipelines, and OOP-driven microservices. Strong foundation in Data Structures, Algorithms, complexity analysis, and Object-Oriented Design with 320+ competitive programming solutions.

EDUCATION

B.Tech, Computer Science and Engineering CGPA: 8.87 / 10.0

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, R
Core CS: Data Structures & Algorithms, OOP & Design, Operating Systems, Computer Networks
Frameworks & Libraries: MongoDB, Express.js, React.js, Node.js (MERN), FastAPI
AI & Machine Learning: PyTorch, NumPy, Pandas, Stable-Baselines3, Gymnasium, sentence-transformers
Databases: MongoDB, SQLite, Oracle SQL
Developer Tools: Git/GitHub, Docker, Postman, Figma
Competitive Programming: Solved 320+ problems on LeetCode

PROJECTS

DarkStore-AI — Autonomous Warehouse Slotting & Picking Optimizer 2026

Python, PyTorch, Stable-Baselines3, Gymnasium, PuLP (ILP), Streamlit, Pandas, NumPy

- Implemented an ILP solver using OOP Python to optimize shelf layouts for 88 high-frequency SKUs on a 13×13 grid, minimizing average picker travel distance by over 35%.
- Built a custom Gymnasium RL environment and trained a PPO agent over 200,000 timesteps using Stable-Baselines3, achieving a 4× improvement in order-picking success rates (15% → 60%).
- Designed a fault-tolerant, scalable modular architecture with clean separation of concerns; exposed a real-time Streamlit dashboard with live route animations and natural-language navigation output.

JobSense — AI-Powered Microservices Job Matching Platform 2025

Python, FastAPI, Node.js, Express.js, MongoDB, sentence-transformers, Docker, Postman

- Architected a scalable, distributed microservices backend for semantic resume-to-job matching, processing 50+ resumes across independently deployable, containerized REST services.
- Designed RESTful APIs in Node.js and FastAPI following OOP principles for concurrent PDF ingestion, vector similarity search, and payload filtering with clean exception handling.
- Containerized services with Docker for consistent cloud deployment; validated reliability through Postman integration and end-to-end API testing.

Smart Attendance System with QR Code 2025

React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.io, JWT, JavaScript, REST APIs

- Engineered a real-time QR authentication system using React and Socket.io with dynamic 10-second token rotation and hardware-level device binding to eliminate proxy attendance.
- Secured the REST API via JWT session management, bcrypt password hashing, express-rate-limit, and Helmet middleware against injection and brute-force attacks.
- Shipped an interactive faculty dashboard with real-time check-in updates, automated CSV export, and a scalable MongoDB backend, reducing manual record-keeping by 80%.

EXPERIENCE

Front-End Developer & UI/UX Designer — ASTKSHR DigiSigns 2025 — Remote

- Translated Figma UI/UX designs into 10+ production-ready React interfaces, integrating RESTful APIs and following component-driven architecture and secure coding practices.
- Reduced development cycle time by ~20% by building a reusable React component library, standardising design-to-code handoff and third-party integration patterns.
- Ensured cross-device reliability through iterative code reviews, unit testing, and debugging workflows across the full frontend delivery cycle.

ServiceNow System Administrator Intern — Cohort 3, FY25 2025 — Virtual

- Managed accounts, roles, and access controls across 3+ permission tiers across the Now Platform.
- Configured and automated ITSM workflows for incident, change, and request management, reducing manual operational touch-points by ~30%.
- Triaged incident reports and completed 100% of ServiceNow Fundamentals and System Administration training within 6 weeks.

Smart India Hackathon (SIH) — Internal College Round 2025

- Shortlisted among top college teams and delivered a working prototype within a competitive window

CERTIFICATIONS

Oracle Cloud Infrastructure: OCI 2025 AI Foundations Associate | OCI 2025 Foundations Associate
ServiceNow: Welcome to ServiceNow (Micro-Cert) | Administration Fundamentals on Demand (Micro-Cert)
